Re: Consumer comments in favor of decoupling, APS rate case, #E-01345A-11-0224

Dear Chairman Pierce and Commissioners:

I am an APS customer who is tremendously concerned about the direct and indirect costs of energy and associated energy waste and strongly urge you to support the adoption of both increased energy efficiency and decoupling in the APS rate case.

The current system is not working for fellow community members or myself. It is a system that consistently rewards utilities for selling the public more energy than needed. *Decoupling* reduces the utility financial disincentives for investing more in energy efficiency programs.

The energy saving conservation programs funded through the APS programs will help me lower my bills by providing a variety of energy efficient services.

Chairman Pierce and Commissioners, I ask that you please support the energy efficiency measures and decoupling provisions relative to the proposed APS rate increase. This will promote and encourage energy saving programs now and in the future, reduce our addiction to fossil fuel, and reduce overall environmental degradation.

Thank you very much for your time and consideration,

Chris Foldesh

Re: Consumer comments in favor of decoupling, APS rate case, #E-01345A-11-0224

Dear Chairman Pierce and Commissioners:

I am an APS customer who is concerned about the costs of energy and energy waste and I strongly urge you to support the adoption of increased energy efficiency and decoupling in the APS rate case.

The current system is flawed. It rewards utilities for selling the public more energy than is needed. *Decoupling* reduces the utility financial disincentives for investing more in energy efficiency programs.

The energy saving conservation programs funded through the APS programs will help me lower my bills by providing a variety of energy efficient services. I can have a professional come to my home and patch leaks, change my air filters, and program my thermostat to yield a more energy efficient home.

Chairman Pierce and Commissioners, I ask that you please support the energy efficiency measures and decoupling provisions relative to the proposed APS rate increase. This will promote and encourage energy saving programs now and in the future, reduce our addiction to fossil fuel thus reducing pollution and harmful Green House Gases that amplify global climate change.

Thank you very much for your time and consideration,

Emily Rosen

Re: Consumer comments in favor of decoupling, APS rate case, #E-01345A-11-0224

Dear Chairman Pierce and Commissioners:

I am an APS customer who is particularly concerned about the costs of energy and our current system that allows for energy waste and strongly urge you to support the adoption of both increased energy efficiency and decoupling in the APS rate case.

The current system is unsound in that it is a system that consistently rewards utilities for selling the public more energy than needed. *Decoupling* reduces the utility financial disincentives for investing more in energy efficiency programs.

The energy saving conservation programs funded through the APS programs will help me lower my bills by providing a variety of energy efficient services that include leakage fixing, air filter change, and more efficient thermostats.

Chairman Pierce and Commissioners, I ask that you please support the energy efficiency measures and decoupling provisions relative to the proposed APS rate increase. This measure will promote and encourage energy saving programs now and in the future, and create a more sustainable environment.

Thank you very much for your time and consideration,

Gena Silvestri

Re: Consumer comments in favor of decoupling, APS rate case, #E-01345A-11-0224

Dear Chairman Pierce and Commissioners:

I am an APS customer who is extremely concerned about the costs of energy and associated energy waste and strongly urge you to support the adoption of both increased energy efficiency and decoupling in the APS rate case.

The current system is not working for fellow community members or myself. It is a system that consistently rewards utilities for selling the public more energy than needed. *Decoupling* reduces the utility financial disincentives for investing more in energy efficiency programs.

The energy saving conservation programs funded through the APS programs will help me lower my bills by providing a variety of energy efficient services.

Chairman Pierce and Commissioners, I ask that you please support the energy efficiency measures and decoupling provisions relative to the proposed APS rate increase. This will both promote and encourage energy saving programs now and in the future, reduce our addiction to fossil fuel, and reduce the overall pollution and greenhouse gas emissions that fill the air.

Thank you very much for your time and consideration,

Michael Wasserman
